**INVEST in your pet's HEALTH!**

A Pet Silo is an airtight dry food storage dispenser that is sealed tight all the time. Rancidity in pet food and bird seed is the cause of many ailments, including cancer. Pet Silo's hatch lid provides a perfect freshness seal guarding against oxidation.

**Totally enclosed - Keeps animals, insects & rodents out.**

Pet Silo not only halts oxygenation of dog food, it avoids exposure to moisture, light, mold spores, storage mites and other pet food spoilers.
